**PETITION FOR APPROVAL OF THE AMENDMENTS TO THE  
INTERCONNECTION AGREEMENT  
NEGOTIATED BETWEEN BELLSOUTH TELECOMMUNICATIONS, INC.  
AND DIECA COMMUNICATIONS, INC. D/B/A COVAD COMMUNICATIONS  
COMPANY, INC. PURSUANT TO THE TELECOMMUNICATIONS  
ACT OF 1996**

COME NOW, DIECA Communications, Inc. d/b/a Covad Communications Company, Inc. ("Covad") and BellSouth Telecommunications, Inc., ("BellSouth"), and file this request for approval of the Amendments to the Interconnection Agreement dated December 19, 2001 (the "Amendments") negotiated between the two companies pursuant to Sections 251 and 252 of the Telecommunications Act of 1996, (the "Act"). In support of their request, Covad and BellSouth state the following:

1. Covad and BellSouth have successfully negotiated an agreement for interconnection of their networks, the unbundling of specific network elements offered by BellSouth and the resale of BellSouth's telecommunications services to Covad. The Interconnection Agreement was filed with the Tennessee Regulatory Authority ("TRA") for approval on February 12, 2002.

2. The parties have recently negotiated two Amendments to the Agreement. The first Amendment updates EEL and UNE Combinations language for all states and Attachment 1 ODUF and EODUF rates for Florida and Attachments 2,3,4 and 7 rates for Florida. The second Amendment updates the Notice information section of the

Agreement. Copies of the Amendments are attached hereto and incorporated herein by reference.

5. Covad and BellSouth aver that the Amendments are consistent with the standards for approval.

6. Pursuant to Section 252(i) of the Act, BellSouth shall make the Agreement available upon the same terms and conditions contained therein.

Covad and BellSouth respectfully request that the TRA approve the Amendments negotiated between the parties.

This 27<sup>th</sup> day of Jan, 2003.

Respectfully submitted,

BELLSOUTH TELECOMMUNICATIONS, INC.

**4. Unbundled Network Element Combinations**

4.1 For purposes of this Section, references to "Currently Combined" network elements shall mean that the particular network elements requested by Covad are in fact already combined by BellSouth in the BellSouth network. References to "Ordinarily Combined" network elements shall mean that the particular network elements requested by Covad are not already combined by BellSouth in the location requested by Covad but are elements that are typically combined in BellSouth's network. References to "Not Typically Combined" network elements shall mean that the particular network elements requested by Covad are not elements that BellSouth combines for its use in its network.

**4.2 Enhanced Extended Links (EELs)**

4.2.1 EELs are combinations of unbundled loops and unbundled dedicated transport as defined in Section 6. BellSouth shall provide Covad with EELs where they are available.

4.2.2 BellSouth will provide access to EELs in the combinations set forth in Section 4.4.1 below.

4.2.3 EELs are intended to provide service connectivity from an end user's location through that end user's SWC to Covad's collocation space in a BellSouth central office. The circuit must be connected to the Covad's switch for the purpose of provisioning circuit telephone exchange service to the Covad's end-user customers. Covad may connect EELs within the Covad's collocation space to other transport terminating into Covad's switch. Covad may also connect the local loops listed in Section 4.3.1.3 to an appropriate Unbundled Local Channel to form additional EELs which terminate in Covad's switch. Provided that the entire EEL circuit meets the criteria set forth in Section 4.3.1.3 below, the circuit may, upon Covad's request, terminate to a CLEC's Point of Presence ("POP"). Covad will provide a significant amount of local exchange service over the requested combination, as described in Section 4.3.1 et seq. below. Upon BellSouth's request, Covad shall indicate under what local usage option Covad seeks to qualify. Covad shall be deemed to providing a significant amount of local exchange service over the requested combination if one of the options listed in Section 4.3.1 et seq. is met. BellSouth shall have the right to audit Covad's EELs as specified in Section 4.3.3 below.

**4.3 Conversions from Special Access Service to EELs**

4.3.1 Covad may not convert existing special access services to combinations of loop and transport network elements, whether or not Covad self-provides its entrance facilities (or obtains entrance facilities from a third party), unless Covad uses the combination to provide a significant amount of local exchange service, in addition to exchange access service, to a

particular customer. To the extent Covad requests to convert any special access services to combinations of loop and transport network elements at UNE prices, Covad shall provide to BellSouth a certification that Covad is providing a significant amount of local exchange service (as described in this Section) over such combinations. The certification shall also indicate under what local usage option Covad seeks to qualify for conversion of special access circuits. Covad shall be deemed to be providing a significant amount of local exchange service over such combinations if one of the following options is met:

- 4.3.1.1 **Option 1:** Covad certifies that it is the exclusive provider of an end user's local exchange service. The loop-transport combinations must terminate at Covad's collocation arrangement in at least one BellSouth central office. This option does not allow loop-transport combinations to be connected to BellSouth's tariffed services. Under this option, Covad is the end user's only local service provider, and thus is providing more than a significant amount of local exchange service. Covad can then use the loop-transport combinations that serve the end user to carry any type of traffic, including using them to carry 100 percent interstate access traffic; or
- 4.3.1.2 **Option 2:** Covad certifies that it provides local exchange and exchange access service to the end user customer's premises and handles at least one third of the end user customer's local traffic measured as a percent of total end user customer local dial tone lines; and for DS1 circuits and above, at least 50 percent of the activated channels on the loop portion of the loop-transport combination have at least 5 percent local voice traffic individually, and the entire loop facility has at least 10 percent local voice traffic. When a loop-transport combination includes multiplexing, each of the individual DS1 circuits must meet this criterion. The loop-transport combination must terminate at Covad's collocation arrangement in at least one BellSouth central office. This option does not allow loop-transport combinations to be connected to BellSouth tariffed services; or
- 4.3.1.3 **Option 3:** Covad certifies that at least 50 percent of the activated channels on a circuit are used to provide originating and terminating local dial tone service and at least 50 percent of the traffic on each of these local dial tone channels is local voice traffic, and that the entire loop facility has at least 33 percent local voice traffic. When a loop-transport combination includes multiplexing, each of the individual DS1 circuits must meet this criterion. This option does not allow loop-transport combinations to be connected to BellSouth's tariffed services. Under this option, collocation is not required. Covad does not need to provide a defined portion of the end user's local service, but the active channels on any loop-transport combination, and the entire facility, must carry the amount of local

exchange traffic specified in this option.

- 4.3.2 In addition, there may be extraordinary circumstances where Covad is providing a significant amount of local exchange service but does not qualify under any of the three options set forth in Section 4.3.1 et seq. In such case, Covad may petition the FCC for a waiver of the local usage options set forth above. If a waiver is granted, then upon Covad's request the Parties shall amend this Agreement to the extent necessary to incorporate the terms of such waiver for such extraordinary circumstance.
- 4.3.3 BellSouth may, at its sole discretion, audit Covad's records in order to verify compliance with the local usage option provided by Covad pursuant to Section 4.3.1. The audit shall be conducted by a third party independent auditor, and Covad shall be given thirty days written notice of scheduled audit. Such audit shall occur no more than one time in a calendar year unless results of an audit find noncompliance with the significant amount of local exchange service requirement. In the event of noncompliance, Covad shall reimburse BellSouth for the cost of the audit. If, based on the audit, Covad is not providing a significant amount of local exchange traffic over the combinations of loop and transport network elements, BellSouth will convert such combinations of loop and transport network elements to special access services in accordance with BellSouth's tariffs and will bill Covad for appropriate retroactive reimbursement. If the Parties disagree as to whether the audits indicate that Covad is not providing a significant amount of local exchange traffic, the dispute will be resolved according to the dispute resolution process set forth in Section 12 of the General Terms and Conditions of this Agreement incorporated herein by this reference.
